Greenhouse Heating Specialists

TRADITIONAL FUELED BOILERS

Thayer offers a complete line of traditional fueled boilers to put the fire into your engineered hot water heating system. We are proud to supply the LAARS boiler product line.

BIOMASS FUELED BOILERS

Biomass boilers will substantially reduce your heating bills. Fuel can be obtained from local sources or grown directly on your land. We have researched, tested and installed a wide variety of biomass boilers and have found none better suited to the needs of growers than the Skanden Multifuel.
